BRETHREN DEPUTATION TO SAS-KATCHEWAN

Rev. Ralph G. Harick, Summer Pastor, in company with Rev. Andrew J. Kaufmann and Mr. and Mrs. John A. Fisher, motored out of town Tuesday of last week and returned this Tuesday. Sent by their District Board to promote some business of the church, they toured southeast of here, motoring a round-trip distance of over six hundred miles in the Fisher "Ford."

The first stop-over was at Redcliff, near Medicine Hat, where—thus—a Brethren mission. Encouragement was given to the members there, with special good wishes to the group of thirty-two people, leaving the next for their new location up in Peace River Country.

Tuesday night was spent in "the Hat." We were favored in having a good host and hostess in the persons of Mr. and Mrs. W. Lyle Wilson, known to some in Arrowwood. That evening there was in the city the season's contest in the game of lawn bowling. Amidst a crowd of enthusiastic men and women witnesses, including the Arrowwood delegation, Wilson and his C. P. R. team, won against the Legion.

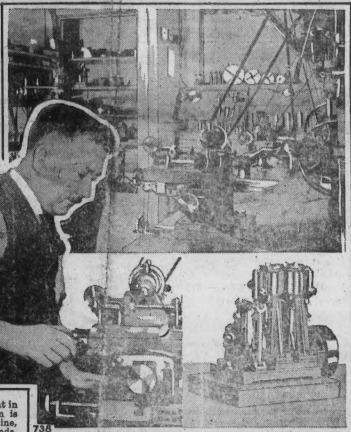

Wednesday's traveling was east to Maple Creek, Sask., then south to Victoria, where there is a Church of the Brethren. The subsequent days at that place were busy ones, but—eventually—enjoyed by visitors and people of the community. Seven preaching services were held—two of them being conducted in connection with an evangelistic campaign, then in its fifth week, conducted by two lady evangelists, in the year by town of Consul. Mr. Harick also gave the message in both of the union services. The one Sunday afternoon service was in Consul and the concluding one was Monday evening in Victoria.

In reporting their findings along the way, our Arrowwood travellers name for the most dried up and desolate stretch of country that lies east of the irrigated section around Brooks on to Medicine Hat. There was scarcely any green in the coloring of the landscape, and at some places on the highway there was a decidedly deep layer of dust. Where we touched in Saskatchewan, there was little rain sufficiently good to justify its being out for threshing. Some were collecting what they could with a header, including the interspersed young Russian settlers to use as feed. They have had some recent heavy rain, but it cannot now do much alleviating of the damage done by the prolonged drought. Comparatively speaking, we aren't so deserving of pity after all who live in and around Arrowwood.

Pastor Harick will be out of town and over at Irricana the coming Sunday. Services here at the church will be held as usual however, and the public is extended the usual cordial welcome. The Sunday School convenes at 10:30, and the preaching services are at 11:30 and 8 p.m. Mr. Harick will be with us again after Sunday and remain with us until his last Sunday, Sept. 13, when he will return to his home at North Manchester, Indiana.

Life's Work Is Hobby, Too

Modeling is a hobby as well as the life's work of Henry Blane Bowen, chief of motive power and rolling stock, Canadian Pacific Railway, who has an up-to-date machine shop in the basement of his Montreal home. Here he has in inventory a number of tools now in use throughout the vast shop system of the company and built a series of model stationary and marine engines, to the great delight of his three sons. He came into particular prominence recently as the builder of the C.P.R. new giant "8000" type, multi-pressure locomotive, the biggest and most powerful of its kind in the world and unique among the American continent destined for heavy duty in the Rocky Mountains. The pictures show the work in the shop, in which many of Mr. Bowen's latest inventions are being completed. He hides himself that it is the most complete private plant in Montreal. Inset, Mr. Bowen is seen operating a milling machine, which he built with his own hands. The model marine engine, shown lower right, is the latest product of the hobby-shop. Although it is only four inches high and could almost be housed in a cigar box, it is complete in the minutest detail and can develop 4000 revolutions a minute. It offers an interesting contrast when considered in comparison with its nearest mammoth locomotive. Mr. Bowen built them both.

735

Welcome to Mrs. Gilbert

The Ladies' Guild of the United Church, met at the home of Mrs. McLeod with Mrs. G. Jones as assistant hostess. The meeting was held complimentary to the Rev. Mrs. Gilbert.

There were over 40 ladies present including old members and visitors. A hearty welcome was extended to Mrs. Gilbert and to old members and visitors by the president, Mrs. Mackie.

An angel food cake nicely decorated, was presented to Mrs. Gilbert by one of the members.

A very interesting and enjoyable program had been planned by Mrs. Ward, Mrs. Kemper and Mrs. Williams, consisting of garden games, after which a delightful lunch was served.

Worth-While Deed

These strenuous times did not deter a Calgary youth from making good. He hitch-hiked to attend the University at Des Moines. "He worked in his spare time to support himself leads his year in all athletics and his high scholastic standing." This record is one to cheer any lad who wishes to make good in anything, while he at the same time accomplishes nothing. He can overcome circumstances.

MIXED FARMING

La Presse: "In all Canadian provinces where mixed farming is the rule, two hours, and fewer days, are lost as far as work is concerned. A really well managed farm leaves little room for idleness, with its varied productions, its daily industry, and its different stock. The work is constant, and for this reason more remunerative, in winter as in summer."

New Initial Pooling Payment 35c Bus.

A despatch recently issued from OTTAWA stated Premier Bennett had announced that the Federal Government would back the Wheat Pool financially in the handling of this crop year. As a consequence, the initial payment under the pooling plan has been raised to 35c a bushel basis No. 1 Northern, Vancouver.

It should be noted that the bonus of five cents a bushel to be paid by the Federal Government is extra, above the 35c initial Pool payment.

INCREASING YIELDS

The application of a definite scheme of crop rotation is being found an important factor in reducing feed cost. The chief advantages of such a practice are:

- (1) Maintaining and improving soil fertility, thus increasing yields;
- (2) Assisting in weed control;
- (3) Assisting in the control of insect and crop diseases by having various crops on fresh soil each year; and it makes a more even distribution of labour throughout the year possible.

Increasing the yield per acre is one of the best ways of reducing cost of production.—Dept. of Agriculture

How to Get Business

It pays to go after business. In fact that is the only way to get it these hard times, and men who know how to do it never neglect one of their best business getters—local advertising.

- "The constant drip of water wears away the hardest stone."
- "The constant guard of Towhee maintains the toughest hen."
- "The constant weeding lover wins the shy and blushing maid."
- "The constant advertiser is the one who gets the trade."

Arrowwood

Arrowwood began its life as a village just north of the present school edifice, where its first school building was erected by James Stewart who opened up a general store in August, 1920.

In February of the year 1921, J. S. Culp & Sons purchased this business and carried on as a company until April, 1921. In conjunction therewith they also conducted a garage business. Then, the partnership was dissolved, the father continuing the general store, the eldest son, R. L. Culp, taking over the control of the garage, and the youngest son returning to finish his education. After finishing his school life the younger son entered into partnership in the garage with his eldest brother. This business is being conducted in the present structure on Centre street erected for that purpose.

The present town site was surveyed in the fall of 1924. The lots were offered for sale about the month of April, 1925, when the village of Arrowwood began its existence.

Arrowwood was incorporated as a village in April, 1926, the first election being held toward the end of May, 1926.

The first council consisted of Reeve Saunders, and Councilors Toy and Ward. This townsite was formerly a portion of the Indian reserve. In the spring of 1911 the government threw the farm land on to the market. Luther Shatto was a first settler, locating about one-third three-quarters of a mile south-east of the village. George Shamberger also settled at the same time on the farm now owned by Lawrence Irvin.

The district was gradually settled by former farmers from North Dakota and Washington. A little later many Canadians came to reside in the district.

Farewelled

There was a fully filled church on Wednesday evening, August 12th, who had gathered to pay their last tribute of regards to Mr. and Mrs. J. Shearer who are leaving for Turner Valley where Mr. Shearer has been appointed Superintendent of some six schools.

Mr. Shearer has been principal of the Arrowwood Consolidated School for some six years. In that time he has not only won the confidence of the pupils but also that of the whole community. The work of his pupils has been very much of the progressive order. He leaves to assume greater duties, but to the great regret of the pupils, school board and parents.

He and his estimable wife have interested themselves in all that was for the welfare of the village, church and school life. Mr. Shearer having been the superintendent of the United Church Sunday school.

It is fitting it mildly to say that they will be missed. But all wish them every success in their new home.

A splendid programme of vocal and instrumental music, readings and speeches, was carried through at the Church of the Brethren, where the gathering was held.

Each member on the program was enthusiastically received and each artist responded. No dull moments were manifest from beginning to the end of the program.

Rev. Gilbert filled the chair to the satisfaction of all concerned.

The program being finished, Mr. and Mrs. Shearer were called to the front. Mrs. Shearer was presented with a lovely basket of flowers by little Betty Jones.

Mr. Malcolm Taylor in a pithy but short address, presented Mr. Shearer with a fine desk set.

Mrs. Shearer in a few, well chosen words thanked her donors for her lovely token of remembrance. Mr. Shearer replied in a short address, in which he spoke of the splendid co-operation he and received both from the students and the school board. He expressed regret at their departure, but considered that he was practically under obligation to accept his new duties.

The following is the program as given:

On Canada! Opening Remarks—Chairman

Piano Duets—Mrs. Weins and Mrs. Leonard

Solo—L. H. Irwin, representing the School Board

Musical Number—Gilbert's Orchestra

Reading—Miss Shatto

Saxophone Solo—Russell Burris

Male Quartette—Melvin Bowman, Francis Mason, Russell Burris, Paul Irvin

Piano Solo—Mrs. Weins

Song—Miss Mackie

Presentation Speech—Malcolm Taylor

Reply—Mr. Shearer

At the conclusion of the programme most dainty refreshments of coffee, cake and sandwiches and ice cream were served in the large and commodious basement of the church. The gathering then dispersed to their various homes.

Bow Valley Resource

Independent.

Publisher every Thursday morning at Arrowwood, Alberta.

Subscription—\$2.00 a year in Canada, \$2.50 in the United States.

All advertising and changes of copy must be in our hands by Wednesday noon.

Advertising rates furnished on request.

Correspondence for publication must bear the writer's signature, not necessarily for publication. We do not necessarily endorse the opinions of our correspondents.

NORMAN G. CARY,

Editor and Publisher.

Salutation

Receiving reports most favorable to Arrowwood and district, we have come to settle in this village and to live and be as one of its citizens. Its people and the opportunities seen have attracted us.

We are here to establish ourselves in the hands of the business people of Arrowwood and district. We want to be a decided acquisition in the life of the town and country. We are at your service and will welcome in our columns, any discussion that is for the betterment of all concerned, but the subject must be discussed.

We will welcome any correspondence from any district point. The signature of the writer must be affixed to all correspondence, not necessarily for publication but that the editor may be assured that the correspondence is bona fide.

We will be pleased to receive any news items. Being complete strangers in your midst we would respectfully solicit co-operation in the gathering of news for the present, at least.

Send us in any local items of interest, or tell us of same and we will endeavor to gather the facts concerning the happening.

We will be glad to receive your yearly subscription of \$2 at our office on Centre street. Unless the subscription is paid or we are assured of its payment, we must pay to the Postal authorities one cent for each copy. Being able to guarantee paid-up subscriptions we get a rate per pound. So you can see our ardor to secure a large number of paid-up subscriptions. What was that you said?

The Inkpot

It is said that during his voluntary imprisonment, Luther saw the devil enter his room and seizing the inkpot hurled it at his head. And present day visitors are shown the very dint in the wall caused by this missile. Whether that mark was due to Luther's action we are not prepared to say, but tradition is unquestionably correct when she teaches that inkpots do make dints.

Historians tell us that the discovery of writing stands among men's highest achievements and journalism is acknowledged as a mighty factor in moulding public opinion. It may be as Carlyle taught, that history is little more than the biographies of great men. But these men were great because they were able to make the people think their thoughts. We have many examples where public action has preceded public opinion and the results have not been satisfactory. But where public opinion is behind the action, no matter how radi-

cal the change it can not fail.

And let us not forget that the local paper is a co-operative enterprise. In the game of competition one store may gain by having its competitor crushed. But no one can gain by having the paper put out of business. It is true that one man or group of men set type and look after the circulation yet the real profits are not to be found in the printer's bank book. They are invested in a better town because of thought and action. Whether it is some improvement needed or an old evil eradicated, information and inspiration can both be wielded through the channel of the printed page.

UNUS SOLUS

Would This Help?

When one is down to the last cent and someone comes along to sell you something, it is very annoying, and if that something is a real necessity, the situation is aggravated. Hence the agent has become less welcome than ever. But some times he leaves values for which we do not sign cheques.

Business was over and we relaxed into quiet conversation. Of course the one topic came to the fore. And our good friend suggested that during the war we borrowed billions to buy explosives and manufacture machines which, for the most part, are useless save for the purpose of destruction. And now that it is all over what have we won? But here is a time of need when life and property could be saved. Is the world in general and Canada in particular, so bankrupt that another large loan could not be launched and some monumental work which would be a benefit to all succeeding generations be constructed. Breadless folk would be fed this winter and something permanent—a highway, harbors or any one of the dozen such projects Canada and her visitors might use—might be left for those yet unborn.

born. Such was my friend's argument and I consented.

Then came the question of the strain and the relaxation. When we have nothing to buy or sell we can feel friendly and talk freely. But as soon as the DOLLAR appears we are all on the qui-vive lest one get the better of the other. In fact the strain sometimes becomes so intense that a story must be thrown in or the deal will be off. We smile now as we look back. All there was at stake was one man's pittance from an insurance premium and the protection of a small insurance policy to one family. This required open-eyed nervousness. But in half-drowsy relaxation we discussed the fate of the thousands of breadless and shelterless in our country.

And is not the solution the buying ability of the people? We make no pretensions to special knowledge in the department of economics. But we know that we do not have too much grain. Give every citizen of this Dominion the means to set up a good table and our so called surplus disappear in six months. We are willing to buy, our luxuries as well as food. The problem is the ability. That elevator wall has become the symbol of a disease. On one side wheat is piled clean to the roof and on the other hungry humanity. And it is a tribute to our civilization that, so far, force has not been used to bring the food and the hungry together. But it cannot go on forever. That monster, whatever it is, symbolized by that wall, must be destroyed. What it is we don't know. But we do know that when people in China or India are foodless, it is because of crop failure but here we have plenty of food yet multitudes go foodless. Surely there is some solution.

The Peace Arch at Blaine, Wash., is the only one of its kind on earth.

Thumb Sketches

Unclaimed Rewards

IT is surprising to note the large number of rewards offered from time to time which still remain unclaimed and the offers of which still remain good.

The largest reward ever offered by the British Government was \$150,000. It was offered in 1745 for the capture of the Young Pretender. I'm not sure whether this was a "dead or alive" proposition. If so the British Government is well advised to repeal the offer because there is no telling what those rocky times may prompt the seeker after wealth to do.

A few years ago the Soviet government of Russia, offered twenty million roubles to the person who would capture and deliver Oszip Letov, who had been Soviet governor of the State of Tzaritan. Oszip and a few friends lit out for some other parts and, so far as I know, are still enjoying the open air.

The World's Grain Exhibition and Conference to meet at Regina in 1932 has over 1,700 standing offers to anybody in the world. The largest of these is an offer of \$50 a pound for 50 pounds of wheat—\$2,500—to any person in the world who will deliver the best sample on or before March 1st, 1932. Among the other big fellows is one of \$80 a cob for the best ten ears of corn—\$800. A lot of people are going to win some easy money next year. This beats the sweepstake plan all hollow. Nothing is left to chance or good luck. If you "deliver the goods" you get the cash.

The International Association of Automobile Clubs in 1913 offered a sum of \$100,000 for a perfect substitute for gasoline of such a nature that it could not be monopolized.

To the inventor of a machine which will efficiently pull and top sugar beets another award of \$10,000 has been offered.

An Old Country paper says:

"Some years ago, the importation into Britain of aligrettes, the white feathers of the egret, was forbidden and feather merchants offered a sum of one hundred pounds to anyone who could devise a method of keeping the egret in captivity. This is one more example of a prize that has never been won."

The hope of reward—some kind of reward—while the source of more evil, is at the same time, a greater impulse for good than anything else in the world. It is man's greatest incentive to action.

FIVE REASONS WHY Alberta POOL Elevators are Worthy of Support

- 1 The greater the volume handled by Pool elevators the less the cost of handling per bushel.
- 2 Pool elevators are not operated for profit. They are operated to give the farmers the best possible service.
- 3 Pool elevators assure patrons safety on grades and weights. Close adherence to a strict policy of fair treatment of patrons in respect to grades, weights and dockage is insisted upon by the management, acting under instructions from the delegates.
- 4 The history of grain handling and selling since the time when the prairies were first farmed up to the present clearly shows the real importance to producers of maintaining an efficient and complete elevator system under their control. This gives producers a power and influence which they otherwise would not have were they dependent only on facilities owned and operated on a profit-making basis.
- 5 The uneven crop in Alberta, with indications of a reduced aggregate yield from former years only increases the urgent need of seeing that the support of Pool elevators, so enthusiastically given in past years, is maintained during the coming crop year to an even greater extent.

R. S. F. in Arrowwood this week and has assumed his duties as operator at the local depot during the grain season.

Harvesting in Manitoba is general. In central and southern Saskatchewan it is well under way.

Single girls prefer the dole of \$5 rather than accept \$16 per month, board and lodging. Are those who, when having work, saved a part of their wages to be taxed to provide sustenance for this class of people?

Reports declare that ten million Chinese are homeless through the floods.

(By Gee)

J. A. Grenier

IN his position as honorary vice-president of the Quebec Committee of the World's Grain Exhibition and Conference, J. A. Grenier, Deputy Minister of Agriculture for Quebec Province, is taking a keen interest in this world-wide coming event.

Mr. Grenier was born at Plessisville, and following his early education studied law at Laval University. When he was twenty-five years of age he was called to the bar and for some few years practiced law.

In 1912 he entered the civil service of his native Province as assistant secretary in the office of the Ministry of Agriculture. Later he became secretary to the Minister and in 1915 he was appointed Deputy Minister, being only twenty-eight years of age at that time.

Mr. Grenier is a member of the Agricultural Council of Quebec, a director of the Dairy Society, and his many services to agriculture have been recognized on several occasions. He has been decorated with the Order of Commander of Agricultural Merit and the Order of the Leopold.

CANNED TOMATOES ARE ALL FOOD AND DRINK

"Doctors and dietetic specialists are pointing to canned tomatoes as an inexpensive corrective food for the whole family, supplying as they do the health values needed to make up for the deficiencies commonly occurring in the average diet," says the Canadian Horticulturist.

The bee must visit 3,360,000 flower tubes in order to get one pound of honey.

DIPHTHERIA CAN BE PREVENTED

We know as much about diphtheria as we do about any other disease, in fact, we know more. We know the germ that causes diphtheria; we know how the disease is spread from one person to another; we know how to cure the disease providing treatment is given promptly on the first day, and, lastly and most important of all, we know how to prevent diphtheria.

We are indeed in the happy position of possessing the knowledge which would enable us to overwhelm diphtheria and to make it one of the rarest diseases. We are in a position to annihilate one of the foes which for generations, has menaced human life and left a trail of

damaged bodies in its wake.

To know this is one thing, but to take the necessary action is another. We know how to prevent diphtheria, but just because we know this knowledge, we will not cause diphtheria to disappear. Diphtheria will disappear when we make use of what we know and not before.

There is a substance called diphtheria toxoid. When this substance is injected under the skin, it stimulates the body to produce the forces which enable it to overcome the poisons which diphtheria germs give off. After a certain number of injections--usually three are sufficient--given at stated intervals the person injected is protected or immunized against diphtheria.

It is a simple, harmless way of securing protection against a disease which is responsible for about nine hundred deaths each year in Canada.

What all those who are responsible for the care of young children should know is that diphtheria can be prevented. But everyone should understand also that diphtheria will not be prevented unless each child is given the necessary injections of diphtheria toxoid where he is immunized or protected.

The responsibility rest with parents. Method of preventing diphtheria has been discovered everyone is being told about it. The family physician is ready to give the injections. In many places, the Health Department furnishes the Diphtheria toxoid. All of this is of no value, however, unless each parent or each person responsible sees to it that his own child or each child under his care is protected.

Diphtheria is a disease which occurs early in life. It is not safe to delay in having children immunized. This should be attended to before the end of the first year, but even if your child is more than a year old and has not as yet received the necessary injection, they should be given without delay.

It is urged upon all parents not to delay in having all their young children immunized. When that has been done, we can say not only that diphtheria CAN be prevented, but also that it HAS BEEN prevented.

Debt Adjustment.

Official Announcement to Alberta Farmers.

The personnel in connection with the administration of the Debt Adjustment Act will be increased and strengthened to the degree necessary to deal with the enlarged number of cases being referred to the Debt Adjustment Bureau.

The Government is seriously considering the placing of representatives of the Bureau at convenient points throughout the Province, to make it possible for those who desire the services of the Bureau, to serve them with the minimum of difficulty. As a preliminary to action by the Bureau those who desire to come under the Act can fill in the form attached hereunder, and forward to the Debt Adjustment Bureau, Calgary, or the Debt Adjustment Bureau, Edmonton, when the office will immediately get in touch with them.

To the Debt Adjustment Bureau, Calgary or Edmonton:

I am having difficulties with some of my creditors and may require the assistance of the Alberta Debt Adjustment Bureau. Kindly send me the necessary forms to fill out

Name of applicant.....
Post Office Address.....

NOTE--Communications from Township 34 and points south should be addressed to Calgary, and those from points north of Township 34 to Edmonton.

BANK CREDIT FOR BINDER TWINE.

Premier Brownlee when in Ottawa discussed with the Dominion Government and the Banks the question of credit being made available to farmers where necessary for the purpose of purchasing binder twine. Arising out of the conference at Ottawa, the banks having superintendents in Alberta discussed with Premier Brownlee on August 11th the question of credits for this purpose, and as a result the Government would advise all farmers requiring binder twine to make application to their banks for credit for that purpose, even if an unsuccessful application has already been made.

IT IS IMPORTANT THAT APPLICATION BE MADE IMMEDIATELY.

Issued by the Government of the Province of Alberta for the information of the People of the Province

News at Large

Calgary police have issued a warning to the public not to take bad money which is being circulated. \$5 bills are being raised to \$20 and are exceptionally clever in workmanship.

Round About Town

Miss Eleanor Roger, of Ravensburg, Sask., is visiting with her cousins, the Christensen children.

Mr. Dahl, of Rutlaw, arrived last Saturday to take charge of the United Grain Growers' elevator at Arrowwood.

Miss Dorothy Vanel, of Arrowwood, returned on Tuesday from a short visit with friends in Southern Saskatchewan.

Jerry Simmons, of Vancouver, the head of the Buffalo Hills ranch south of town, was here last week on a trip of inspection.

Master Maurice Samm, of Brooks, Alberta, arrived on the 15th inst. for a holiday visit at the home of his friend, Editor Cary, of the Resource.

Tourists are finding much fault with the condition of the Calgary - Highway. Who of us wouldn't? It is not a real credit to those in authority.

Principal Shearer and family left on Wednesday for their new home at Black Diamond, Alta. Mrs. Leith accompanied them to their new home for a short visit.

Mrs. C. G. Taylor and little daughter returned last Friday to their Arrowwood home from a short visit at the homes of her brother and sister at Brooks, Alta.

R. H. Bishop, manager of the local Bank of Nova Scotia, returned last Monday from a month's holiday. He and Mr. Bishop made the trip by auto to Michigan.

Master Floyd Cary, after a month's holiday, visiting his mother at Vernon, B. C., and his grandparents at Armstrong returned to his new home at Arrowwood, via Glenora, on Thursday.

Mr. W. M. Burris, living some ten miles north-west of Arrowwood, is very enthusiastic over the new Runely 3-6 tractor that he recently purchased through Larsen Implements. This is the first of its make in Alberta.

F. L. Christensen, one of Arrowwood's general merchants, returned on Tuesday from a trip to Ravensburg, Bismarck, for Carl who had been visiting at the home of her aunt at Ravensburg, returned with her father.

William Jones moved a granary to his rented farm, some three and a half miles south of Arrowwood, on the 13th inst. He used fourteen horses to pull the structure from his farm a mile north of town, where his residence was destroyed by fire last fall.

REGISTRATION OF THRESHING MACHINES

(Sec. 2, Chap. 163, R. S. A. 1922)

Every person, firm or company owning or operating a threshing machine or separator (including combines), shall each year before commencing operations register the machine or machines with the Minister of Agriculture and shall procure a certificate of registration.

Registration fee—One dollar for each machine.

Vol. 1, No. 1 Arrowwood, Aug. 10, 1931 Items for 1931

Arrowwood Gets Much Needed Newspaper

With a great deal of pleasure and satisfaction we are, this week, able to speak to you through the "Bow Valley Resource." Some six weeks ago we met the Editor, Norman C. Cary, on his first visit to our city in search of a desirable location to establish a newspaper plant. Several weeks were spent by Mr. Cary looking over the "Provinces of B.C. and Alberta" before deciding that the wheat lands tributary to Arrowwood looked best for his future success. The need of a newspaper has long been

felt by the business men and citizens. Now it is supplied by a man with years' of successful experience and a talent of which we will be proud.

Through "Resource" comes the people of Arrowwood and surrounding country can speak to the outside world and let them know that the "Resource" is printed in one of the best districts in Alberta. Let us all rally to the support of this new enterprise and we bespeak for Mr. Cary a bright outlook.

Our stock is complete, our line is the best, our service is yours for the asking.

The more the farmer depends on power machines the more dependable those machines must be. It is not enough to deliver him a machine of high quality and efficiency; it must be kept efficient—and that means service.

Power farming machines must have as good service as automobiles, and because they are more vitally necessary they ought to have better service—Alexander Legge.

W. M. Burris and son Russell are the proud owners of a new Runely 3-6 tractor which they use to do their harvesting and combining with. It is one of the smoothest running, easily operated power units that ever drew an in-

take or coughed an exhaust. The "W" in line continually develop the punch and to watch it operate is certainly a treat for sore eyes.

There's many a slip 'twixt the cup and the lip and that is why a wise baby drinks from a bottle.

Our Slogan—"The lines of machinery that we represent are built right—our service will help keep them right."

Here's to you Norman Cary,

Here's to you;

Here's to you Norman Cary,

Here's to you;

We're behind you to a man.

From the best town in the land

Here's to you Norman Cary,

Here's to you.
